DOCKING DEVICE CLASS SYSTEM AND METHOD

La Vaughn F. Watts, Jr.

ABSTRACT OF THE DISCLOSURE

A method including but not limited to detecting a docking device class circuit present on a bus, and obtaining a description of at least one device in a docking station from the docking device class circuit. In one embodiment the method further includes but is not limited to controlling the at least one device via commands appropriate to the bus. In one embodiment, circuitry is utilized to effect the foregoing-described method. In addition, a related docking station having a docking device class circuit is described.
